# Skills

React.js

React Native

Redux

Next.js 13

TypeScript

Cypress

Testing Library

MongoDB

MySQL

Figma

Tailwind

Node.js

Express.js

# Notable Projects

## Blocs [\(visit\)](#)

Blocs.me is a set of Notion Widgets that help users track their habits with beautiful visuals. Currently blocs has over 20,000 users.

The project is build with theme-ui, Next.js and FaunaDB + serverless functions for REST APIs.

## TechJobMarkt [\(visit\)](#)

TechJobMarkt.de is a job board for the best tech jobs in Germany. It was build with heavy amounts of data to analyse the top VCs and relevant companies in the country.

With this the app is able to scrape top jobs from the internet that would otherwise be hidden away on LinkedIn.

## Phoenix Medical Systems [\(visit\)](#)

This site was built for phoenix medical systems India and uses Next.js with Tina CMS integration to make content management a breeze for the marketing team.

The re-vamp improved SEO and has a near 100% lighthouse score.

## FramerLib [\(visit\)](#)

One of the biggest competitors to WebFlow today is Framer. However, similar to WebFlow, although Framer is more intuitive there are places that require code to get the job done.

FramerLib solves this problem by a making complex interactions & functions simple with a code-components library for Framer.
